SHALINE M. DAVIDA

JUNIOR SOFTWARE ENGINEER • shalinedavida@gmail.com • GitHub• LinkedIn

SUMMARY

Junior software engineer with project experience contributing to web and mobile applications, RESTful APIs, database schemas, and user-facing dashboards. Worked across React, JavaScript, Django REST Framework, PostgreSQL, and Kotlin on projects focused on healthcare access and agricultural cooperative management. Interested in building usable, maintainable software that addresses practical user needs.

EDUCATION & COURSES

AkiraChix / codeHive — Diploma in Information Technology | February 2025 – November 2025

Courses: Quality Assurance, Backend Development, Frontend Web Development, Mobile Development, UX Research, UI/UX Design, Product Management

PROJECT EXPERIENCE

HaliCare

Collaborated on a mobile platform designed to connect people living with HIV/AIDS in Kenya to nearby clinics and counselling services, supporting access to care during USAID funding disruptions.

- Conducted research into user needs and contributed to user-centred solutions, UI wireframes, visual designs, a system architecture diagram, and an informational website built with HTML, CSS, and JavaScript.
- Designed and implemented PostgreSQL database schemas and developed RESTful APIs with Django REST Framework to manage user data.
- Integrated external location APIs to support discovery of nearby clinics and counselling centres.
- Contributed to a React dashboard intended to streamline booking workflows and patient-record management for clinicians and administrators.
- Developed and executed test cases, considered edge cases, and participated in debugging; used Postman and browser DevTools to investigate issues and validate API responses.

CoopConnect

Collaborated on a team that helped digitise cooperative management and farmer training scheduling.

- Conducted primary and secondary research to understand cooperative-management needs and identify practical solutions for planning and scheduling farmer training sessions.
- Designed logos, mockups, and UI wireframes using Figma and Adobe Illustrator; created a system architecture diagram outlining the system structure, components, and interactions.
- Created an informational website using HTML, CSS, and JavaScript.
- Developed PostgreSQL database entities and schema, and developed Django REST Framework APIs to manage users' data.
- Created a React dashboard to simplify training-schedule management for cooperative administrators; participated in agile product management and task tracking using Jira.

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, UI Wireframing, Figma

Backend & APIs: Python, Django REST Framework, RESTful API Development, External API Integration

Databases: PostgreSQL, MySQL, SQL, Database Schema Design

Mobile: Kotlin, Android Studio

Tools & Collaboration: Git, GitHub, Jira, Postman, Browser DevTools, Cypress, GitHub Actions, Adobe Illustrator
